Press Release

3 Minute Material Processing Challenge

Laser Photonics is proud to offer its New 3 minute Material Processing Challenge!

FASTER! HIGHER QUALITY! SAVE MONEY! LESS MAINTENANCE! GO GREEN!

What Is It?

A quick online survey to educate manufacturers on the benefits of using a laser system for your material processing.

4 EASY STEPS:

Step 1: Click this Link http://www.laserphotonics.com/3_minute_challenge.php

Step 2: Fill In the Required Fields

Step 3: Submit Form

Step 4: Wait to receive a 1 page custom email containing a summary of:

How a Laser System would improve your specific application

Which type of system would be right for your application

An average cycle time using a Laser system

Approximate cost of system

Who Is It For?

Anyone who is currently or thinking about processing any metals, plastics, glass, wood, etc. in their production - This includes marking, engraving, cutting, welding, etc. applications!

[Positions](#)

[Industries](#)

CEO's	Automotive
Company Owners	Medical
COO's	Aerospace
Shop Floor Managers	Government
Machine Operators	ALL MANUFACTURERS!
Engineers	

Why Take The Challenge?

It is no secret lasers are the future of material processing. Laser systems are quickly replacing most methods in the marking, engraving, cutting, and welding. They are used in the processing of all metals, plastics, glass, wood, etc.

There is no cost to this challenge. The purpose is to educate manufacturers on their material processing options. **Laser Photonics just requests you review the information and keep it on file for consideration of your next equipment purchase.**

"We don't have to spend a lot of time convincing customers they want a higher quality way to process their materials. We just have to let them know we have the systems to do it."

– Ryan Semmer
