Press Release

New Fiber Tower Series with 2009 Upgrade of the Liberty Laser

LAKE MARY, FL., Aug. 14, 2008 – Laser Photonics has recently announced one of its upgrades to its popular laser marking and engraving product line the FiberTower series for the 2009 models. The new Liberty Laser is a state-of-the-art fiber laser of different strengths depending on the application. The combination of speed, performance and versatility of these systems cannot be matched by any other marking technique. Laser Photonics marking and engraving products range from the smaller Compact system to larger machines such as the MegaCenter. This ensures no matter the size of the company or application Laser Photonics can provide an affordable system which is easily integrated into any production facility.

2009 Upgrade

Now Available with the Liberty Laser. The Liberty Laser is Laser Photonics most advanced fiber laser module to be installed in 2009 FiberTowers. The new Liberty Laser allows for more precise marking and engraving capabilities, especially in the deep engraving sector. The Liberty Laser allows those applications requiring deep engraving to be performed faster and with more clarity. Laser Photonics researchers and engineers have spent many hours testing and perfecting the new technology to create an exact model for the standard systems.

“The addition of the Liberty Laser to our systems will definitely benefit our future

customers, especially anyone looking to improve the quality of their aluminum plate marking or deep engraving," stated Edgardo Rodriguez, Director of Sales. The Liberty Laser has been a major accomplishment for Laser Photonics and allows the Fiber and CO2 laser system manufacturer to stay ahead of the competition with the latest technologies.
