Press Release

Laser Photonics attending the FABTECH Show

The [FABTECH International & AWS Welding show](#), North America's largest metal forming, fabricating and welding event, is coming soon. Visit Laser Photonics at this show Nov. 11th - 14th in Chicago, IL.

[Laser Photonics](#) will showcase the [SBM 1200](#), your ideal solution for cutting plastic, acrylic, wood, stone, aluminum, stainless steel and most other metals. The SBM1200's precision cutting reduces the need for edge refinement and significantly increases material yield. The SBM1200 features a CO2 laser with up to 1000w of power allowing for the highest cutting quality at the fastest cutting speeds. The system's small footprint and user-friendly interface allow it to be easily integrated into existing production lines with minimal productivity loss. Also, because of the direct drive structure there are no belts, rotary encoders or gears to wear out and forced air cooling increases the optics lifetime tenfold!

To learn more about Laser Photonics technology, and for all product features and benefits, visit www.LaserPhotonics.com. To see the quality of our systems and application possibilities for your company, please visit us in Booths 10032 and 34067 at FABTECH, Nov. 11 - 14.
