Press Release

Laser Depot to Rent Marking and Engraving Systems

Now You Can Try Before You Buy

Lake Mary, FL - September 1, 2007

The world class FiberTower XP Compact™ [laser marking system](#) is now available to U.S. customers for monthly rental through Laser Depot, a new division of Laser Photonics, LLC. Until now, the XP Compact™ and other systems in the Fiber Tower™ Series product line were only available for purchase through Laser Photonics.

The nation's first laser rental program will make state-of-the-art fiber laser marking and cutting technology accessible to many smaller companies and manufacturers who were not previously able to afford it.

Why rent? [Laser rental](#) is great for short-term projects and there are no long-term liabilities. Renting a system prior to purchasing can help expedite the decision-making process by allowing a risk-free trial without a major capital investment. Another benefit of trying before buying is that at any point during the rental period, clients can decide to buy and Laser Depot will apply 50 percent of rental payments toward the purchase of the system.

The FiberTower XP Compact™ laser marking system will rent for \$3000 a month. For more information on renting the FiberTower XP Compact™ visit www.laserdepot.net. For more information on the other systems in the FiberTower™ Series product line available for purchase visit www.laserphotonics.com.
