Press Release

Medical Design & Manufacturing TradeShow

We at [Laser Photonics](#) would like to thank you for stopping by our booth at the MDM West Expo in Anaheim, CA. We had the [SBM1200](#) laser cutting system on display and were demonstrating the capabilities of our Fiber Laser marking systems with the [Handheld](#) and [FiberTower Compact](#). Integrating the very latest in Fiber Laser technology, intuitive software and state of the art hardware, our industrial grade marking systems perform various applications such as [UID](#) (Unique Identification), DPM (Direct Parts Marking), bar codes, 2-D symbols, logos, graphical designs and

serializing at a high rate of speed and with minimum programming time, maximizing your throughput. They can mark on a variety of materials such as: plastics, composites, polymers, aluminum, steel, stainless steel, titanium, ceramics and many others. Whether you are turning to laser marking for inventory management, complying with new federal regulations or improving the look of your product, let us

provide you with a complete turn key solution for your application. If you require high precision laser cutting, we have medium and large format, fiber laser and CO₂ laser cutting systems available as well.

We are industry leaders in developing high-tech Fiber and CO₂ laser marking, cutting and engraving systems for a variety of industries, such as; aerospace, automotive, medical, solar and semiconductor to name a few. We exceed in manufacturing high quality, performance driven turnkey solutions for these and many other industries.

We will be showcasing additional systems at the MDM East Expo, so please be sure to visit our booth June 3-5, 2008 in New York, NY. Our marking and engraving systems are eco-friendly, compact and easy to use. To learn more about Laser Photonics technology, and for all product features and benefits, please visit www.LaserPhotonics.com or call our office at 407-829-2613.
