## Press Release

### Laser Photonics Has Relocated

[Laser Photonics](#), a division of [Fonon Technology International](#) and manufacturer of Fiber and CO<sub>2</sub> laser systems, has relocated. As plans for the future expand and our growth increases drastically, we had the need to acquire a 318,000 square foot facility in Lake Mary, FL. This large facility allows Laser Photonics to continue its hiring efforts, build large format laser systems and rapidly increase production times.

"This move is a huge stepping stone to becoming the leader in high power Fiber Laser system manufacturing. The facility provides more manufacturing space and the ability to readily have available systems in stock for standard orders. This will make Laser Photonics a greater force in the laser community," Demitri Nikitin founder and CEO states.

Established in 2002, Laser Photonics has grown from a company with 25 employees in a 30,000 square foot facility to a company with 85 employees occupying a 318,000 square foot facility. Visit [www.laserphotonics.com](http://www.laserphotonics.com) or contact our office at 407-829-2613 to learn more about Laser Photonics' growth, updates and system information.
