Press Release

Medical Device & Manufacturing Show

Laser Photonics Showcases its Products

Laser Photonics is excited to announce that we will be attending the [MDM West show](#) January 29-31, 2008 in Anaheim, CA. We invite you to visit us in Hall E at booth #554. This year MDM West combines with seven other manufacturing shows to deliver a full range of industry applications. At this show you can expect to see manufacturers in the electronics, packaging, automation, plastic and medical industries.

Laser Photonics will be showcasing a wide range of systems including the first ever [Handheld](#) system, perfect for direct part marking. We will also be showcasing the [SBM 1200](#) which is excellent for cutting and engraving of metal, plastic, and wood. The popular [FiberTower XP](#), will also be one of our featured systems, used for marking of metals and plastics. These systems will be operational so feel free to bring your own samples: bone screws, surgical tools, stents, scissors, plastic parts, etc., and we will be happy to mark, cut or engrave them for you.

Contact us at www.laserphotonics.com or 407-804-1000 to receive complimentary tickets to a combination of all seven shows. We hope to see you at our booth!

Happy Holidays!
